SL Power Presents Highly Efficient Power Supplies for Medical, LED Lighting, Test and Measurement Applications at Stand 263 during electronica 2016

Powering Critical Solutions is the Theme for 4-day Munich Show

VENTURA, Calif. — October 19, 2016 — SL Power Electronics, an industry leader in the designing and manufacturing of high-efficiency power supplies, will showcase their families of AC/DC power solutions for a wide range of medical, LED lighting and entertainment systems and test and measurement applications during electronica in Hall A3, Stand 263. At this leading international trade fair for electronic components, systems and applications, SL Power executives will discuss important issues such as 4th Edition EMC standard for medical devices, the latest on LED lighting trends and new Level VI+™ products.

SL Power will showcase a range of product innovations including:

- Internal power supplies for next generation medical systems. The [MU425](#) family addresses the complex and unique power needs of surgical equipment, home healthcare therapeutic devices and imaging equipment as well as other critical healthcare applications that require clean, reliable power for the highest level of performance. Compact and highly efficient – up to 90 percent – the MU425 AC/DC power supplies are approved to CSA/EN/IEC/UL60601-1, 3rd Edition 2 means of patient protection (MOPP) isolation. In addition, for home healthcare devices and equipment, the new power supplies meet EN61000-4-2, EN61000-4-3 and EN61000-4-6.
- Power solutions for challenging cooling issues in LED lighting and audio/video equipment. SL Power will showcase its [LB240](#) which is the smallest 240-Watt power supply featuring multi-cooling options in a 3 inch X 5 inch package. The LB240 is a highly efficient single-output power supply that is ideal for high-intensity entertainment applications, such as stage lighting and audio/video control systems, due to its ability to operate efficiently in any cooling condition and/or tight space.

- The [TB110 Series](#) AC/DC internal power supplies that provide the optimum power solution for many types of noise-sensitive test equipment including analyzers, signal generators, analytical instruments and more. Offering up to 90 percent efficiency, these models address problematic interference and susceptibility issues – saving development time and ensuring smoother end-product design. Feature-rich, compact and highly efficient, the TB110 product family easily fits into a 1U (1.75 inch) chassis and provides up to 110 Watts.

For more information on SL Power's extensive offering of power supplies for a wide variety of demanding applications, contact a local SL Power representative listed on the SL Power Web site at www.slpower.com.

About SL Power Electronics

SL Power Electronics (a subsidiary of Handy & Harman Ltd.) is a global leader in the design, manufacturing and marketing of differentiated internal and external AC/DC and DC/DC power conversion solutions for demanding Medical, Test & Measurement, LED Lighting, Audio/Visual, Information Technology Equipment, Data/Telecom, Industrial and other OEM applications. For more information, visit www.slpower.com.

About Handy & Harman Ltd.

Handy & Harman Ltd. (HNH) is a diversified manufacturer of engineered niche products with leading market positions in many of the market segments it serves. Through its wholly owned operating subsidiaries, HNH focuses on high-value products and innovative technology and serves customers globally across a wide range of end markets.
