

CONVECTION RATING

The amount of power that is available from a product without relying on forced air or conduction cooling. It simply relies on the natural movement of heated air. Using only convection cooling minimizes the need to rely on forced air, thereby increasing reliability and minimizing system cost by eliminating the need for a fan.

POWER DENSITY

The amount of power per unit volume, expressed as Watts-per-cubic-inch (w/in^3). Power density is an important consideration where space is constrained, and the maximum amount of power is desired.

RELIABILITY & EASE OF INTEGRATION

Reliability is the degree to which a specification can be depended on to be accurate. This can relate to a products ability to consistently operate as specified.

Ease of Integration is related to the minimal amount of additional effort required to successfully integrate a power supply into the end equipment in which it is to operate.

CINT1175

BENEFITS

- 175W Air Cooled, 120W Convection Cooled
- Compact 2"x4" foot print for 1U Applications
- 90% Efficiency Typical at Full Load
- < 200 μ A Leakage Current
- 3 Year Warranty

FEATURES

- Remote Inhibit, AC Power Fail & DC OK signals
- Approved to IEC60601-1 3rd Edition

VALUE PROPOSITION

- Meeting Class B EMI Levels with margin ensures less effort by the system designer to integrate a power supply into the end equipment.
- Built-in protections against unstable operational environments minimize the need for implementing at the system level, resulting in shorter development time and reduced cost.
- Use of high quality electrolytic capacitors well below their threshold and ESR ratings help extend the life of the end equipment, and minimize field service needs.
- High convection rating minimizes the need to rely on forced air, thereby increasing reliability and minimizing system cost by eliminating the need for a fan.
- SL Power local technical support capabilities provide real time help in solving potential design problems which could otherwise cause revenue loss due to delays in end product introduction.
- Extensive global presence can support customers product needs as they migrate from development to production, frequently in multiple locations around the world.

CINT1200

BENEFITS

- 200W Air Cooled, 180W Convection Cooled
- Compact 3"x5" foot print for 1U Applications
- Over 90% typical efficiency
- High convection power under harsh thermal conditions
- Operates at temperatures as low as -40°C to +70°C

FEATURES

- Over current, over temperature, and short circuit protection
- 5EN/CSA/UL/IEC 60950-1 2nd Edition

VALUE PROPOSITION

- Highest forced air and convection ratings in the industry.
- Available with Class I and Class II input versions.
- Ideal for applications in harsh temperature conditions. Operates between -40°C to +70°C
- Built-in protections against unstable operational environments minimize the need for implementing at the system level, resulting in shorter development time and reduced cost.
- Use of high quality electrolytic capacitors well below their threshold and ESR ratings help extend the life of the end equipment, and minimize field service needs.
- SL Power local technical support capabilities provide real time help in solving potential design problems which could otherwise cause revenue loss due to delays in end product introduction.

GB60

BENEFITS

- 60W Convection Cooled
- Power density is more than 25% higher than other 2"x3" products
- Wide temperature range of -10°C to +80°C
- Level V Efficiency Compliant Models
- 6.67 Watts/IN³ power density @70°C
- Does not require a heating element to turn on at -40°C

FEATURES

- Optional Power ON LED
- RoHS Compliant
- Approved to CSA/EN/IEC/UL60950-1, 2nd Edition

VALUE PROPOSITION

- The smallest convection cooled 60W power supply in its class.
- Reliably delivers 40W at 70°C without the need for a fan. Reducing total application cost.
- Does not require a heating element at -40°C saving \$2 to \$10 per unit and improving end application efficiency.
- High convection rating minimizes the need to rely on forced air, thereby increasing reliability and minimizing system cost by eliminating the need for a fan.
- SL Power local technical support capabilities provide real time help in solving potential design problems which could otherwise cause revenue loss due to delays in end product introduction.

LB115

BENEFITS

- 75W Convection Cooled/115W with 200 LFM
- Small size of 2" x 4" x 1.3"
- Level V Efficiency Compliant
- -20°C to 70°C operating temperature
- Zero audible noise
- No need for EMI filter: Cost and space reduction.
- High convection and conduction rating

FEATURES

- Meets EN55015 Conducted EMI
- Meets IEC61000-3-2 Class C for less than 1 Watt to full power
- Approved to UL/CSA/IEC/EN60950-1, 2nd Edition
- Optional LED indicator for power-on

VALUE PROPOSITION

- A new LED power supply family intended for low power applications in stage lighting & signage markets.
- Design to meet European Lighting requirements of harmonic distortion at 0% dimming.
- With international safety approvals, it provides a seamless integration in marketing the end user fixtures across the globe.
- Delivers considerable power at elevated temperatures over 50°C.
- First SL Power product to use Combined PWM & PFC combo chip reducing component count and higher reliability.

TB65S

BENEFITS

- 65W of power in a compact 2" x 3.5" package
- Enhanced EMI performance ensures easy integration into end equipment
- Will ride-through unstable mains power fluctuations, ensuring continuous operation

FEATURES

- Class B EMI with margin
- >10 year e-cap life
- PSU Temperature Monitor
- Remote Inhibit, Status Signals

VALUE PROPOSITION

- Meeting Class B EMI Levels with margin ensures less effort by the system designer to integrate a power supply into the end equipment.
- Built-in protections against unstable operational environments minimize the need for implementing at the system level, resulting in shorter development time and reduced cost.

MB60

BENEFITS

- 60W Convection Cooled
- Power density is more than 25% higher than other 2"X3" products
- Wide temperature range of -10°C to +80°C
- Level V Efficiency Compliant Models
- 6.67 Watts/IN³ power density @70°C
- Does not require a heating element to turn on at -40°C

FEATURES

- Optional Power ON LED
- RoHS Compliant
- Approved to medical standards of IEC60601-1 3rd Edition with 2 MOPP

VALUE PROPOSITION

- To get 40W at 70°C, most system require an 80W power supply in a bigger size and higher cost.
- Possible reduction in size by 25% for end-application. A great marketing advantage over competition.
- Requiring a heating element can be costly and requires wasted space. Using the MB60, the end-application can save money and space.
- On the other extreme temperature range, it is the -40°C start up feature of the MB60 than can save \$2 to \$10 in reduction of a heating element. This is not just a cost savings, it is also an overall increase of efficiency for end-application.
- One of the most significant advantage of MB60 is that it can delivery 40W power at 70°C.
- SL Power local technical support capabilities provide real time help in solving potential design problems which could otherwise cause revenue loss due to delays in end product introduction.
- Extensive global presence can support customers product needs as they migrate from development to production, frequently in multiple locations around the world.

MB120

BENEFITS

- 100W Convection Cooled and 120W Air Cooled
- 2" x 4" x 1.25" Package, Ideal for 1U Applications
- 10-year Life design with Premium E-Caps
- Class B Conducted and Radiated EMI performance
- BF Isolation Type Rated

FEATURES

- Designed to meet new IEC 60601-1-2 4th Edition EMC requirements
- [Approvable] to AAMI ES/CSA C22.2 /EN/IEC60601-1 3rd Edition
- 2 x MOPP Isolation
- <0.5 W Standby Power
- 3 Year Warranty

VALUE PROPOSITION

- A superior performance 120 Watt AC to DC power supply designed for next generation medical applications.
- Feature rich and highly efficient, MB120 product family can easily fit in a 1U chassis and provides 100 Watts of convection power.
- Input & output and internal temperature monitoring/alarms are features of the MB120 family.
- All models are CE marked to low voltage directive and approved to AAMI ES/CSA C22.2 No./EN/IEC60601-1, 3rd Edition.
- The design takes into consideration the pending international release of the new IEC 60601-1-2, 4th Edition EMC requirements. With low leakage current performance, the power supplies are BF rated.
